TROPICAL CYCLONE BULLETIN NR. 3
Tropical Depression LUIS

Issued at 11:00 AM, 02 August 2026
Valid for broadcast until the next bulletin at 5:00 PM today.

LUIS MAINTAINS ITS STRENGTH WHILE MOVING NORTHWESTWARD OVER THE SEA EAST OF QUEZON PROVINCE.

Location of Center (10:00 AM)

The center of Tropical Depression LUIS was estimated based on all available data at **400 km East of Infanta, Quezon (15.0°N, 125.4°E).**

Intensity

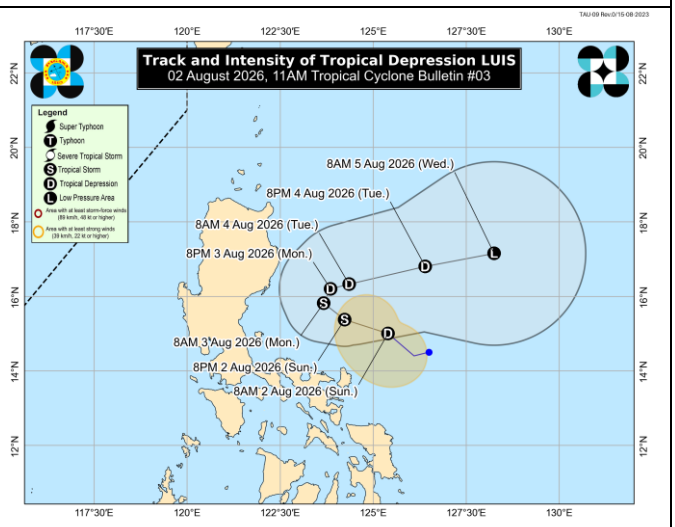
Maximum sustained winds of **55 km/h** near the center, gustiness of up to **70 km/h**, and central pressure of **1002 hPa.**

Present Movement

Northwestward at 15 km/h

Extent of Tropical Cyclone Winds

Strong winds extend outwards up to **150 km** from the center



TRACK AND INTENSITY FORECAST

Date and Time	Center Position			Intensity		Movement dir. and speed (km/h)
	Lat. (°N)	Lon. (°E)	Location	MSW (km/h)	Cat.	
12-Hour Forecast 8:00 PM 02 August 2026	15.4	124.2	280 km East of Baler, Aurora	65	TS	WNW 10

TROPICAL CYCLONE BULLETIN NR. 3
Tropical Depression LUIS
Issued at 11:00 AM, 02 August 2026
Valid for broadcast until the next bulletin at 5:00 PM today.

TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT			
TCWS No.	**Luzon**	**Visayas**	**Mindanao**
1 Wind threat: **Strong winds**	**Polillo Islands, Camarines Norte, the northern portion of Camarines Sur** (Caramoan, Presentacion, Garchitorena, Lagonoy, Tinambac, Siruma, Goa, San Jose, Tigaon, Calabanga), and **Catanduanes**	-	-
	Warning lead time: **36 hours** Range of wind speeds: **39 to 61 km/h (Beaufort 6 to 7)** Potential impacts of winds: **Minimal to minor threat to life and property**		

OTHER HAZARDS AFFECTING LAND AREAS

Heavy Rainfall Outlook

Refer to **Weather Advisory No. 3 issued at 11:00 AM today** for the heavy rainfall outlook due to TC LUIS and the Southwest Monsoon.

Severe Winds

The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

- **Minimal to minor impacts** from strong winds are possible within any of the areas under Wind Signal No. 1.

The possibility of hoisting Wind Signal No. 2 is not ruled out.

The Southwest Monsoon and the periphery of LUIS will bring **strong to gale-force gusts** over the following areas (especially in coastal and upland areas exposed to winds):

- **Today (02 August):** Marinduque, southern portion of Mindoro Provinces, Romblon, mainland Masbate, Caluya Islands, Siquijor, Southern Leyte, Camiguin, and Dinagat Islands.
- **Tomorrow (03 August) and Tuesday (04 August):** Most of Luzon and Visayas, Lanao del Norte, Misamis Occidental, Camiguin, Surigao del Norte, Dinagat Islands, Davao Occidental, and Davao Oriental.

Tropical Depression LUIS
Issued at 11:00 AM, 02 August 2026
Valid for broadcast until the next bulletin at 5:00 PM today.

HAZARDS AFFECTING COASTAL WATERS

24-Hour Sea Condition Outlook

Up to moderate to rough seas over the following coastal waters:

- **Up to 2.5 m:** The northern seaboards of Camarines Norte, Camarines Sur, and Catanduanes; the eastern seaboard of Davao Oriental.
- **Up to 2.0 m:** The seaboard of Isabela; the eastern seaboards of mainland Cagayan, Catanduanes, and Davao Occidental; the northern seaboard of Aurora.
- **Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions**.

Other coastal waters have forecast wave heights of less than 2.0 m.

TRACK AND INTENSITY OUTLOOK

- **It must be emphasized that heavy rainfall and severe winds may still be experienced in localities outside the landfall point and the forecast confidence cone. Refer to "Other Hazards affecting Land Areas" for more details. Furthermore, the track may still shift within the limit of the forecast confidence cone.**
- LUIS will continue to move generally northwestward in the next 24 hours before turning east northeastward for the remainder of the forecast period. Based on the latest forecast track, the center of LUIS will remain over the Philippine Sea. However, a westward shift in the forecast track may result in landfall or close approach to Northern or Central Luzon.
- LUIS is forecast to intensify into a tropical storm in the next 24 hours while moving over the sea east of Central Luzon. It will likely remain a tropical storm for only a short period. Afterwards, as LUIS begins to turn generally east northeastward, a weakening trend is expected. It may be downgraded into a remnant low by Wednesday (05 August) before becoming fully assimilated into the circulation of Typhoon DOLPHIN.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 5:00 PM today.
